STUDIO

WEB DESIGN & DEVELOPMENT STUDIO · OMAN

Web design that brings you **new** **customers.**

We design and build fast, bilingual websites, online stores and web apps for businesses in Oman, the GCC and worldwide. Arabic and English, built for Google, ready for WhatsApp.

Company Profile

2026

kodarostudio.com

A web studio from Oman, building for the whole region

Many businesses in Oman and the Gulf have excellent products and services, but their websites don't show it. They're slow, hard to use on a phone, or available in only one language.

We set up Kodaro Studio to fix that. We're a small, remote-first studio, so you work directly with the people who design and build your site, without layers of account managers.

The name comes from code. Our logo is a K made from a code bracket, a reminder that good design only matters if it's built properly underneath.

languages shipped

3,400+

pages on our largest build

100%

of our sites are bilingual

Bilingual by default

Arabic and English designed together, with right-to-left layouts done properly, not translated as an afterthought.

Built for Google

Clean code, fast pages, structured data and a separate URL for each language, so both audiences can find you.

Fast on every phone

Most of your visitors are on mobile. We design for small screens first and keep every page light.

See it before you commit

You get a clickable prototype of the key pages within days, and we refine it with you before we build.

WhatsApp and social ready

Contact buttons, WhatsApp chat, Instagram links and ad tracking, set up and tested.

You own everything

Your domain, your content, your code. A clear handover, with a short video showing your team how to edit.

Websites, online stores and web apps, in Arabic and English

01

Business websites

A clear, fast, bilingual website that explains what you do in seconds and makes it easy to call, message or book.

- Arabic and English, designed together
- Mobile-first design
- On-page SEO built in
- WhatsApp and contact forms

02

Online stores

Fast product pages, a checkout people trust, local payments and delivery for Oman and the GCC, in Arabic and English.

- Bilingual product catalogue
- Local and card payments
- Delivery zones
- Orders and stock admin

03

Web apps & portals

Custom systems for bookings, clients, staff and reports. They run in any browser, in Arabic and English, with no app store needed.

- Booking and appointments
- Client and partner portals
- Dashboards and reports
- Internal tools

04

SEO & multilingual sites

Arabic and English speakers search differently. We build and optimise sites so each audience finds you in its own language.

- Keyword research per language
- Separate URLs and hreflang
- Structured data
- Technical SEO fixes

Also part of what we do

Landing pages for ads

Single pages built to convert Instagram and Google ad traffic, with tracking set up.

Hosting and care

Hosting, backups, security updates and monthly content edits.

Website redesign

A fresh, faster site that keeps your existing Google rankings.

Content writing

Clear website copy in Arabic and English, written for your customers and for search.

From first call to launch in four clear steps

01

Discover

A short call or form about your business, customers and goals. We study your competitors and send a written proposal with scope and timeline.

Days 1-2

02

Prototype

A clickable design of the key pages in both languages. You comment on it directly until it feels right.

Days 3-7

03

Build

We develop the site on a private preview link you can open any time, with progress updates every week.

Weeks 2-3

04

Launch & grow

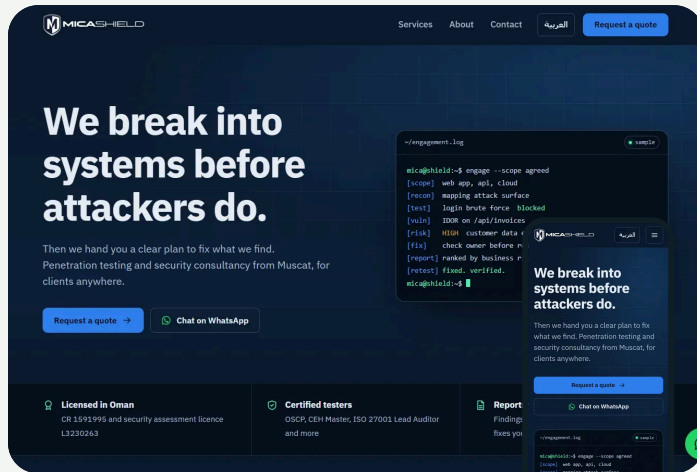

Speed and SEO checks, Google Search Console, analytics and a handover video. Then ongoing care if you want it.

Weeks 3-4

What you receive

- A written proposal with scope and timeline
- A fast, bilingual website or app
- Analytics and WhatsApp contact set up and tested
- A clickable prototype in both languages
- SEO setup: Search Console, sitemap, structured data
- A handover video and post-launch support

Real websites, live and working for our clients

Corporate site

English + Arabic

Lead generation

Mica Shield

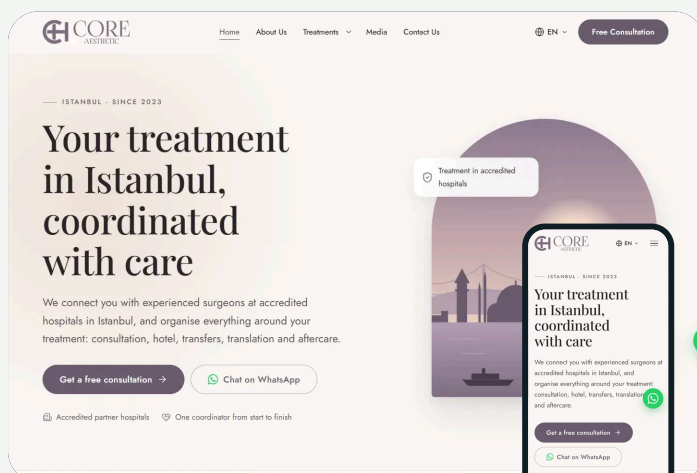

Muscat, Oman · Cybersecurity

A sharp, technical site for an Omani cybersecurity firm offering penetration testing, red teaming and ISO 27001 consulting.

What we built

- A terminal-style hero that shows how an engagement runs
- Service pages written to rank for searches like "ISO 27001 consultant Oman"
- A quote request form and WhatsApp contact on every page
- Arabic and English versions with matching structure

mica-shield.com

Multilingual SEO

EN · AR · DE · FR

3,400+ pages

Core Health Turkey

Istanbul, Türkiye · Medical tourism

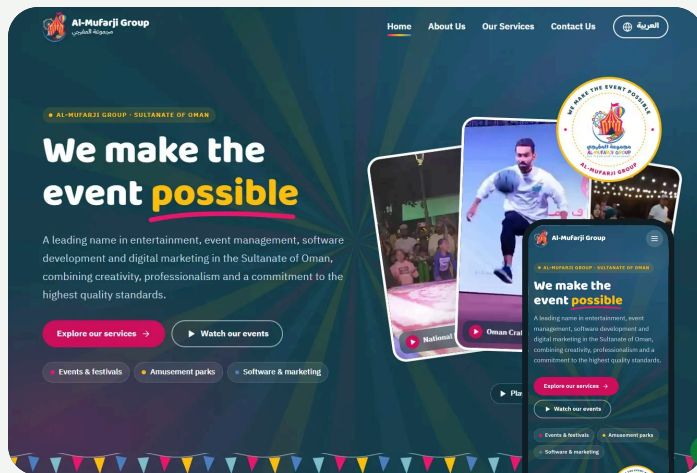

A four-language medical travel site with a dedicated page for every treatment, more than 3,400 pages in total.

What we built

- A content system that generates consistent treatment pages in four languages
- hreflang links and structured data across every language version
- A consultation request and WhatsApp flow designed for international patients
- Partner hospital and hotel sections that build trust

corehealthturkey.com

SELECTED WORK

Corporate site

Arabic + English

Media gallery

Al-Mufarji Group

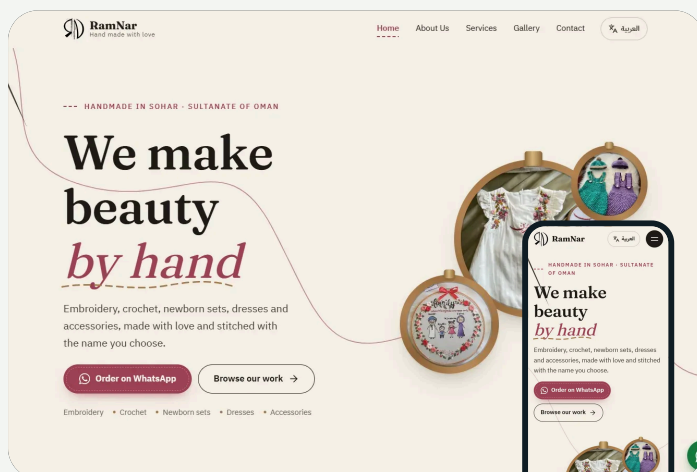

Oman · Events & entertainment

A vibrant, bilingual site for an Omani group behind events, festivals, amusement parks and digital services.

What we built

- A festive visual direction drawn from the group's own brand
- Sections for events, festivals, amusement parks and software services
- A photo and video gallery that loads fast on mobile
- A full Arabic version with a right-to-left layout

tasalyom.com

Small business

Arabic + English

WhatsApp ordering

RamNar

Sohar, Oman · Handmade retail

An Arabic-first site for a handmade embroidery and crochet label, with ordering through WhatsApp and delivery across the GCC.

What we built

- A warm, hand-drawn visual style that matches the craft
- Product categories and a gallery that work as a catalogue
- One-tap WhatsApp ordering from every product
- Local SEO for Sohar and Oman in Arabic and English
